## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, 13, 14, 17, drawn to a method of preparing a RecA-like recombinase /single stranded nucleic acid probe complex and a kit for preparing the complex.

Group II, claim(s) 11, 12, 18-20, drawn to a method for targeting, enriching, detecting and/or isolating double stranded nucleic acid by contacting a RecA-like recombinase /single stranded nucleic acid probe complex with a sample containing the double stranded nucleic acid.

Group III, claim(s) 15, drawn to a method of detecting a double stranded nucleic acid in a fixed sample by in situ hybridization using a RecA-like recombinase /single stranded nucleic acid probe complex.

Group IV, claim(s) 16 and 21, drawn to a method of detecting a double stranded nucleic acid in a living cell sample by in vivo gene targeting using a RecA-like recombinase /single stranded nucleic acid probe complex and to a kit comprising RecA-like recombinase /single stranded nucleic acid probe complex.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Radding et al. (U. S. Patent No. 4,888,274) teaches complexes between RecA protein and single stranded nucleic acids which may be used for enrichment of double-stranded DNA and other reactions (Abstract).

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1637

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Teresa E Strzelecka whose telephone number is (703) 306-5877. The examiner can normally be reached on M-F (8:30-5:30).
